To Customers

Regarding the Situations at Miki Pulley after the East Japan great earthquake disaster

We would like to announce that the production at Miki Pulley came back to the previous situations as the result of total effort from all of us, in order to minimize the confusion caused by the earthquake.

We will try to do our best for normalizing production.
Thank you very much for your continuous support and assistance.

Yours faithfully

Notice

Production ; Normalized

Material ; The most of materials have no problem. However, The materials of some special parts are suffering problems for purchasing due to the disaster. Therefore, we may ask for the delivery adjustment.
